MEMORANDUM FOR: Chief, Programs Division, ORR

25X1A ATTENTION : [REDACTED] Strategy and Trends Branch  
THRU : Chief, RG/RB/CGS  
FROM : Chief, CIA/PID (NPIC)  
SUBJECT : Emba Airfield, USSR  
REFERENCE : Requirement No. C-RR4-81,931 (Project No. C 1672-64)

25X1D 1. In response to Requirement No. C-RR4-81,931 (C 1672-64), a study was made of the 11 "possible" fighter aircraft seen on [REDACTED] Emba Airfield, USSR (48 44N-58 02E).

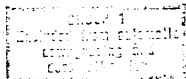

25X1D 2. The quality of [REDACTED] was fairly good, however, identification of the aircraft must remain at 11 possible fighters, probably with swept wings. This does not preclude the possibility that these are liaison aircraft, however, [REDACTED] was analyzed and revealed that 9 definite swept wing fighters, probably FAGOT/FRESCO, were parked in the same line where the 11 possible fighters are located on [REDACTED]

25X1D Three additional probable FAGOT/FRESCO are parked in the next row in back of the 9 probable FAGOT/FRESCO bringing the total count on this mission to 12. This is not to say that the aircraft observed on [REDACTED] and those observed on [REDACTED] are the same aircraft, 25X1D however, the possibility that they are the same is quite good.

25X1A 3. The photo analysis on this project was performed by [REDACTED] 25X1A CIA/PID/GMB (NPIC), who may be contacted on ext. 2548 for any additional information.

4. This memo completes the referenced requirement.
